

An MSNBC report dated September 10 entitled, "Study: 300,000 U.S. kids in sex trade" said, "At least 300,000 and perhaps as many as 400,000 U.S. children are victims of the sex trade each year . according to a university study released Monday." The report added, "That's 1 of every 100 children in the country."

The report went on to say, "Every place we went, we found for every girl there was a boy involved, too." This is an incredible finding! This fact suggests that homosexuals (who compose less than 3% of the population) are molesting as many children as heterosexuals (who compose 97% of the population) are. Of course, no one will want to discuss this part of the story.

Societal acceptance of homosexuality and promiscuous heterosexuality has created a climate in our culture that has turned our children into sex toys. Major fashion magazines and clothing companies dress our children in the garb of gutter prostitutes. Television sitcoms and Hollywood motion pictures glamorize teen sexuality, and, of course, MTV and similar networks have been promoting child sex for years. What is even more disgusting is that all of this has taken place without even so much as a whimper from most of America's parents or preachers.

To be sure, our country's laws currently prohibit adult/child sex, and most people still find the practice repulsive - but for how long? Pedophilia is exactly at the place in our culture where homosexuality was just 25 years ago. Twenty-five years ago, homosexuality was a subculture movement. Today it enjoys social acceptance, political protection, corporate equality, even religious blessing. Absent a spiritual and moral awakening in our country, 25 years from now pedophilia will enjoy the same right of passage. Child sex is already here; it is only a matter of time before it becomes mainstream.

Is this the kind of country we want to bequeath to our children? If not, we had better start standing up now because that is exactly the kind of country that these social engineers are creating.

Child Sex: It is Here Already

By Chuck Baldwin

September 11, 2001

A couple of years ago I said, "If America continues on her current path, in another 25 or 30 years pedophilia will be as socially acceptable and politically protected as homosexuality is today." Reaction to that statement ranged from total disbelief to open ridicule. I stand by my statement.

The election of a Republican Congress and President has done nothing to change the course of the country. The presence of nearly 400,000 evangelical churches has done nothing to change the course of the country. In truth, both seem content with America's course. This being the case, the acceptance of adult/child sex cannot be far away. In fact, pedophilia is already a billion dollar industry in our country.
