JOINT LEGISLATIVE  
AUDIT COMMITTEE  
NATIONAL CHAIRMAN  
AMERICAN  
LEGISLATIVE EXCHANGE COUNCIL

July 25, 2000

Dear Fellow Legislator:

Please treat the enclosed book as a valuable reference and resource for your work in government, because it provides you with history and current information of the utmost importance for your understanding of many issues crucial to the future of our country. As soon as you read my reasons for saying this, you will agree that I am not overstating the case.

I am giving you this eye-opening new book, Kinsey: Crimes & Consequences, because I am asking you to join in your state to protect America's families and young people. I urge you to read it all, and then to have your staff members do the same.

I also want to introduce you to the book's author, Dr. Judith A. Reisman, because she can help you a great deal. She is the foremost expert in America on the work of Alfred C. Kinsey, father of the sexual revolution. Through pioneering and careful research, Dr. Reisman proves that Kinsey had a revolutionary political agenda, committing scientific fraud to further his mission and that his "research" involved in active collaboration in committing of sexual crimes in the name of scientific experimentation.

The implications of these indisputable discoveries are staggering. Besides being a public relations nightmare for the education establishment and its many defenders in the liberal cause, they give us the basis for calling for and making far-reaching reforms in American law and public education. Dr. Reisman says that if enough legislators can call attention to Kinsey's questionable findings we can start to reverse the liberals' assault on traditional morality and law carried out on the authority of The Kinsey Reports.

Kinsey: Crimes & Consequences exposes the entire Kinsey "grand scheme" And new canon: His publicly funded fraudulent data; his use of child sexual abuse as a scientific protocol; and the use, state by state, of his phony "research" to justify reducing the penalties for, or even totally decriminalizing, the entire spectrum of sex offenses against our most vulnerable citizens, women and children.

This book is sent to you as a public official by concerned citizens so you can expose public expenditures that rely on the now-disproven Kinseyism. These concerned citizens expect to be working to assist you in identifying bills and appropriations that illegally disseminate Kinseyite "harmful matter" at the taxpayers' expense.

State governments across our country continue to spend the taxpayers' money for programs and agencies based on Kinsey's skewed findings or that disseminate Kinseyism. Any accredited "sexuality"-related program, by definition, teaches Kinsey's pathological sexual license -- and that results in out-of-wedlock births, venereal diseases and sexual and marriage dysfunction.

There is now, as a result of Dr. Reidman research, substantial evidence that Kinsey's findings were false, his research was fraudulent, and his science was questionable. We have evidence of his

criminal behavior and his use of criminals as researchers. Dr. Reisman's book makes a powerful and compelling case for a change in public policies on this matter.

So please read Dr. Reisman's outstanding book, and then contact her, or her colleague Eunice Ray, to schedule a meeting and a briefing so that you will be knowledgeable and equipped about what can be done in your state to recall new laws created upon the false Kinsey authority and restore American standards to our state laws.

Thank you!

Sincerely,

A handwritten signature in black ink, appearing to read "Ray Haynes", written over a circular stamp.

State Senator Ray Haynes  
ALEC National Chair
