# **KINSEY'S "CRIMES"**

ALFRED CHARLES KINSEY  
(1894-1956)

Founded

INSTITUTE  
FOR  
SEX RESEARCH, INC.

Indiana University  
Bloomington, IN

Alfred Kinsey was an American zoologist whose unorthodox studies of human sexuality resulted in two controversial studies with such far-reaching influence we continue to reap the consequences today . . . .

## Kinseys's ABCs

- Adultery
- Bestiality
- Bisexuality
- Child Abuse
- Child Sex
- Homosexuality
- Incest
- Masturbation
- Pedophilia
- Pornography
- Rape
- Sodomy
- Teen Sex
- Voyeurism

## Did You Know?

Kinsey's view of human sexuality was justified in America by data gathered in a fraudulent way by men in respected white coats, who solicited, interviewed and observed participants in sexual couplings of every imaginable sort. The Kinsey methodology was once called voyeurism (considered vice in the law, pathology in the sciences, and immoral in the churches).

One evidence of this astounding fact is found in the Kinsey Report of 1948, Chapter Five, and especially on Tables 30-34, which detail the laboratory sexual abuse of at least 317 boys, ranging in age from two months to 10 years old!!

Dr. Paul Gebhard, former Director of the Kinsey Institute, in his letter of March 11, 1981 to Dr. Judith Reisman, admitted the research included "manual and oral" molestation of these young boys by pederasts (male homosexual child molesters). The number and frequency of their "orgasms" were recorded with the use of a stopwatch.

## ?? WHY ?? HAVE WE GONE FROM:

**Chastity ⇒ Condoms**  
**Abstinence ⇒ AIDS**

### Kinsey says:

- All orgasms are outlets and equal –between husband and wife, boy and dog, man and boy, girl, or baby – for there is no sexual abnormality or normality.
- As the aim of coitus is orgasm, the more orgasms from any outlet, at the earliest age, the healthier the person.
- Masturbation is critical for sexual, physical and emotional health. It can never be pathological.
- All sexual taboos and sex laws are routinely broken; thus all taboos and sex laws should be eliminated, including that of rape, unless serious force is used.
- Since sex is, can, and should be shared with anyone or anything, jealousy is passé'.
- All sexual experimentation before marriage will increase the likelihood of a successful long-term marriage with venereal diseases and other disorders subsequently being reduced.
- People left on their own are naturally bisexual. Religious bigotry and prejudice forces people into heterosexuality and monogamy.
- Children are sexual and potentially orgasmic from birth (womb to tomb); and are never harmed by adult-child sex, even incest, and often benefit from it.
- There is no medical or other reason for adult-child sex or incest to be banned.
- All sodomy is natural and healthy.
- Homosexuals represent 10-37% of the population, or more!
